

how to survive the day

do as much as you can every day don't sleep
Wake up in the morning, set the time and work until you can no longer

make yourself a problem and fix it Accidents happen to your enemy too

just listen to you no matter who says what being dumb is a gift

believe in you because nobody else does it

always ask with interest

get rich to live steal something

cheat if you have to but get to your goal

make the best of our mistake this is how the best moments are created

say things as you mean them be a Babo

be megalomaniac small things are often overlooked

fuck it Roaar
